

Vinyl Finishes

Starline Windows offers various options for vinyl frame finish.

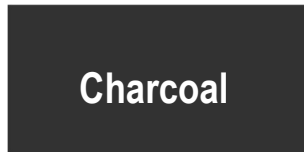

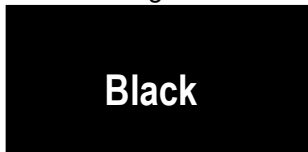

Starline standard finish for the exterior and interior of the vinyl frame is Standard White. The extrusion is left as a bare substrate (not painted) as the colour is impregnated into the vinyl material.

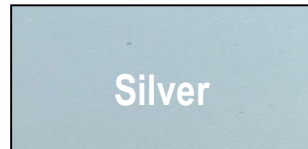

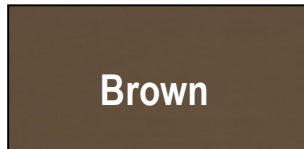

OPTIONS

There is an option to paint the exterior of the frame using an exterior grade UV cure coating which is specifically designed for use on vinyl fenestration products. This coating contains 100% solids, thus emits no volatile organic compounds (VOC's) or hazardous air pollutants (HAPS). Refer to the **CCI UV Cure Technical Data Bulletin** document in the Miscellaneous section of the catalogue for technical information on the UV Cure paint.

The following **standard UV cure colours*** are available:

The following **semi-standard UV cure colours*¹** are available:

***All colours are available to be painted on the exterior and interior except for the 6000 series.**

Please note: Standard and Semi-standard colours are available for an additional cost. May require up to a 4 week lead time.

Custom colours may also be available. The scope of work and overall custom colour quantity will be reviewed by Starline on a project specific basis to determine the feasibility of the custom colour request.

Please note: Custom colours are available for an additional cost premium. An approximate 12 week lead time is required to procure custom colour requests.

¹Semi Standard colours that are painted on the exterior and interior must have a minimum of 10 windows to apply

Colour images shown above are for reference only and do not show 100% true. These are digital images of colour chips which show the light hitting the colour from different directions. Please contact Starline Windows for swatches or samples.
