

OBSCURED GLASS OPTIONS

Starline Windows offers a variety of obscured glass options for your glazing needs. Starline's standard obscured glass pattern is **Pinhead**. The additional obscured glass options that we offer are:

- Cathedral
- Rain
- Satin Etch
- Flute
- Gluechip
- Arctic Clear

Please note:

- Other options may be available on a project specific basis. Please consult your Starline Windows representative for additional information.
- Flute, Gluechip, Rain, and Arctic Clear have a rough surface which requires the rough surface to face out on surface #4 of the Insulated Glass Unit (IGU). This is required to ensure that the IGU's have a good and sound seal. The other obscured glass that we offer has the rough surface glazed in, on surface #3 of the IGU.

PINHEAD (STANDARD)

CATHEDRAL

FLUTE

RAIN

GLUECHIP

SATIN ETCH

ARCTIC CLEAR

Obscured Glass Thickness and Maximum IGU Sizes

PATTERN	AVAILABLE GLASS THICKNESS	MAXIMUM IGU SIZE (APPLIES TO EACH MM THICKNESS) ²
Pinhead	3mm, 4mm, 5mm, & 6mm	Width: 72" x Height: 96"
Cathedral	4mm	Width: 72" x Height: 96"
Flute ¹	4mm	Width: 72" x Height: 96"
Rain ¹	4mm, 5mm, & 6mm	Width: 72" x Height: 96"
Gluechip	3mm & 5mm	Width: 60" x Height: 84"
Satin Etch	3mm, 5mm, & 6mm	Width: 130" x Height: 96"
Arctic Clear	4mm	Width: 72" x Height: 96"

1 Note: The pattern runs vertically not horizontally.

2 Note: The thickness of glass is dependant on the size of the IGU. Please refer to the Max IGU Area table in all Starline product catalogues.
