

Brickmould

Brickmould is an external casing that frames the outside of windows and door for a stylish finish. Perfect for both renovation and new construction the brickmould attachment offers new depth and personality in contrast to a standard frame.

Starline Windows offers two different brickmould profiles in both small and large sizes. The contoured brickmould showcases a more contemporary look, while the flat brickmould is more of a traditional look.

Brickmould Sizes

- Small: 3/4" (flat & contoured cover caps)
- Large: 1 5/8" (flat & contoured cover caps)
