

Series 4500R

Thermally Broken Aluminum Sliding Balcony Door

Hardware

The Series 4500R sliding balcony door has a commercial handle made from die-cast aluminum. The interior handle is a hook latch-locking handle that positively engages with an adjustable keeper (non-keyed) at the frame jamb. Mill finish is available and is powder coated to match the exterior and interior frame colour.

The sliding panel slides on an adjustable ball bearing steel wheels.

Standard Commercial Handle

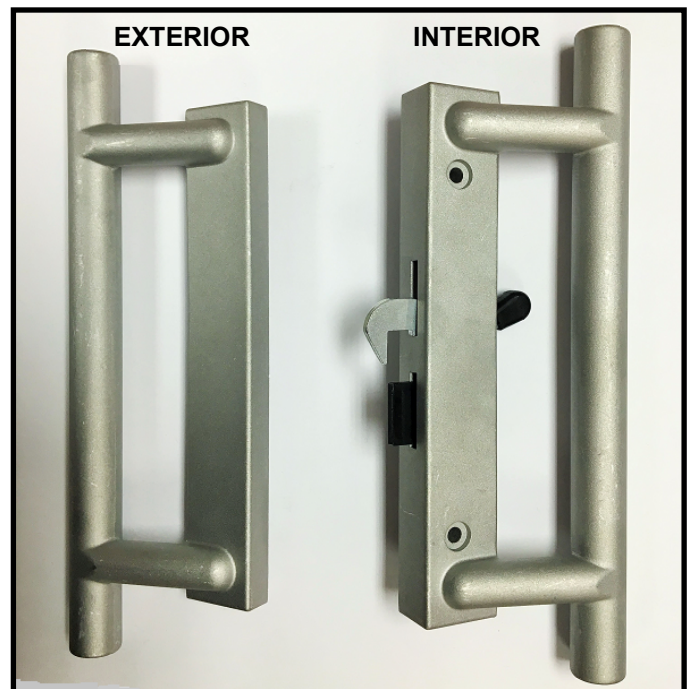

The Standard Commercial Handle is designed for aluminum sliding doors.

Made from die-cast aluminum.

Mill finish and is powder coated to match the exterior and interior frame colour.
