

# Unitized Curtain Wall Thermally Broken Aluminum Awning/Fixed Window

The standard handle for the Unitized Curtain Wall awning windows is a die cast aluminum Cremone handle.

1 handle is included per awning and is fitted to the sash to be opened with the right hand.

This handle has a 90 degree rotation and clip positing in opening and closing.

It is fitted with 2 multipoint sliders at the bottom underside of the awning, that engages or disengages the multipoint locking system when the handle is closed or opened.

The handle is available in black, white, and silver.

The operable vent will be restricted to 4".
